Notice of Proprietary Information

The information in this document and the matters it describes are confidential and are the exclusive property of INSYST Private Limited and should not be disclosed to any Third Party without the prior written consent of INSYST Private Limited.
Company Background:

InSyst Private Limited (InSyst) - is an effort to bring in new and better solutions in the field of Information Technology specially Optical Fiber and Wireless Communication. It was started with a handful of young IT professionals in the year 2003. With the increasing customer base, their demand for more technical support and of course, to broaden its own scope, it has become a Private Limited Company with more qualified staffs and Board of Directors. The Company's main aim is to exploit better technologies for the development of Information Technology in the country.

INSYST has been catering services ranging from Server configuration, installation and maintenance to Network establishment such as Microwave communication, Satellite communication (VSAT) and Optical Fiber communication. To be in the pace of time, it has started working in the field of "communication" viz. email, Intranet and Internet. Today it has grown from a small business to a strongly motivated organization with dedicated and professional staffs and a strong customer base. Its success as an excellent service provider is exemplified by satisfaction of its customers.

Our interest in Information Technology stands a wide range of activities including distribution, installation and commissioning, system integration, facilities management and training to turnkey project implementation as well as a wide range of services to support the customers.

VSAT installation and maintenance

INSYST has done numerous VSAT installations all over the country. It has provided the solutions with both the C-band and Ku-band systems. It has been providing continuous support at all those sites and maintained them. It has installed and maintained VSAT at Namche, the gateway to Everest, one of the highest place on planet earth.

Hardware supply and installations

INSYST has supplied and installed various computer products, peripherals, networking equipment, UPS and other accessories to a large number of customers. Its customer base includes government, educational institutes and other business sectors.
Networking and System Integration

INSYST stepped into networking and system integration business as a natural extension from its large customer base of commuter products. It is one of the leaders in providing structured cabling service for local area network layout in Category-5 technology. Its trained and technically certified team of engineers and technicians have designed, installed, trained and supported various networking systems on Novell Netware, Microsoft Windows NT/2000, Linux and windows for workgroup platforms.

Organizational Structure:

At Present INSYST Private Limited has 12 fulltime staff who are in their respective fields. In addition to staff, INSYST is please to provide the services of three highly qualified resource advisors who have been working in various sectors in Nepal. Professional services from these resource consultants are available on full time or part time basis depending on the nature of work and its requirements.
